

Technology & Investment Consultant M&A & Technology Value Creation

ALBERTO LEBRON

Technology Advisor
Program Manager – Co-Founder

Engineer, entrepreneur and technology consultant with over 18 years of experience advising large corporations, scale-ups and technology-driven businesses across Automotive, Aerospace, Software and Deep-Tech sectors.

Over the years, I have supported complex transformation and growth initiatives, working at the intersection of technology, operations and strategy.

I currently work as an independent advisor supporting Private Equity firms, investors and management teams in technology-related M&A and value creation initiatives. My work focuses on technology due diligence, scalability and execution risk assessment, product and platform reviews, and the definition of technology-led value creation plans across pre-investment and post-investment phases until the advice in post-merge operations.

I bring a hands-on and entrepreneurial advisory approach, collaborating closely with investors, founders and executives to translate investment strategy into clear, executable technology and business roadmaps, with a strong focus on AI-enabled systems and scalable architectures.

Telecommunications Systems Engineer
MSc. Telecommunications
M&A and Private Equity
